Code of Ethics

Soly

As members of Soly, we subscribe to the following principles and standards set for ourselves, along with the standards followed by B Corporation. Implied in this Code of Ethics is full compliance with all federal laws and regulations, along with within our best interest acting on the global environment and climate crisis.

We are committed to:

- Operating for the sole purpose of making solar energy accessible for everyone, combating climate change, and improving communities in which our impact reaches
- Conducting business in alignment with the highest standards of ethical conduct, set for ourselves, along with the ethical standards set by the B Corp movement
- Meeting and exceeding the solar energy needs of our customers and partners, with the highest knowledgeable and professional knowledge and means
- Treating our customers and stakeholders in a most honest, transparent, and ethical manner, and conducting all business in good faith
- Portraying our products and services accurately, honoring our warranties and promises, and ensuring we justify our customer's confidence in our expertise and services
- Solving the concerns that our customers may have in a professional and swift manner
- Providing products sourced from ethical, transparent suppliers of whom prohibit all forms of illegal labor and raw material sourcing
- Adhering to the standards B Corporation sets for its member organisations

Certified B Corp organizations meet the highest standards of social equity, environmental performance, public transparency and moral accountability to balance profit and mission. This is how we help build an inclusive and sustainable economy.
